

TOTAL CONCRETE SOLUTIONS

COMPANY PROFILE

WHAT CAN TOTAL CONCRETE SOLUTIONS PROVIDE?

Licensed building practitioners

- We can provide you with a Record of Works and PS3 documentation

Methodology to save time and money

- Matt is experienced at working with engineers on the methodology of designs to save money on labour, materials and visits to site.

Quality assurance

- In-house systems such as quality assurance checklists, weekly project and schedule updates including photos ensure you are up to date with the project's progress. Our job management software ensures our team have access to all plans and projects in real time. This software records their time on site and can provide reports with labour hours and descriptions.

Seamless integration of trades & authorities

- Our team can meet with and schedule Council inspectors, Engineers and other trades.

Diverse Team

- As a collective our team covers a large range of trades saving you time and money. Our team are qualified builders, concrete placers, concrete cutters, and STMS. We also operate our own digger, bobcat and truck.

Insurances

- Public Liability \$10m, Statutory Liability \$500k, Vehicles and Equipment

Prioritised Health and Safety

- TCS has a robust Health and Safety programme. We are SHE local authority prequalification approved. We can provide a comprehensive SSSP on request. Our team are drug tested and police vetted.

Administration & Communication

- A dedicated admin and operations team ensure reliable communication and timely issue of quotes, tenders, schedules, payment claims, RoW and PS3.

Suppliers & Sub-Trades

- We have strong relationships with our subcontractors and suppliers ensuring quality products supplied on time. We have worked with Thomsons ITM, Firth, A1 Pumps and Trowel trades for over 10 years.
